Juntas

Homocinéticas 2017

TRT AUTOPARTES le ofrece productos y servicios de la más alta calidad y una diversidad de piezas de suspensión, dirección y juntas homocinéticas.

En **TRT AUTOPARTES** estamos conscientes de la evolución tecnológica del mercado automotriz y tomamos el compromiso de crecer al ritmo que nos exigen nuestros clientes para estar dentro de sus expectativas de calidad y precio por medio de un sistema de mejora continua en nuestros productos.

El ser líder en el ramo y tener un crecimiento constante, son sinónimos por **TRT AUTOPARTES** dar eficiencia y esfuerzo encaminado a la satisfacción total de nuestros clientes.

¿Quiénes somos?

Somos una empresa familiar, con más de 50 años de experiencia en la comercialización al mayoreo de partes de repuestos automotrices tanto nacionales como importados.

Misión

Satisfacer las necesidades de nuestros clientes, con productos de calidad y de vanguardia a nivel mundial.

Visión

Ser el mejor distribuidor de autopartes en México, manteniendo el 100% de nuestros clientes satisfechos.

Nuestra Filosofía

“HONRAR EL PASADO, INVENTAR EL FUTURO”

CARACTERISTICAS DE LAS JUNTAS:

FLECHAS DE VELOCIDAD CONSTANTE:

Las flechas de velocidad constante TRT están fabricadas con el grado óptimo de fijación en las juntas, lo que permite un manejo suave aun cuando el rendimiento de la carretera sea muy exigente. La marca TRT tiene la solución ante la vibración y la dureza de los caminos con las flechas de velocidad constante de alto desempeño para permitirle a usted tener un viaje muy tranquilo y confortable.

JUNTA LADO RUEDA

Las juntas homocinéticas lado rueda TRT son fabricadas con los más selectos materiales y han pasado por muchos procedimientos de diseño de precisión, así como a pruebas severas antes de ser empacados para nuestros clientes. Esto permite brindar un año de garantía contra defecto de fabricación.

JUNTAS LADO CAJA

En la junta de lado caja la unión con la flecha homocinética que puede ser de tripode o de baleños, tiene una idea diferente puesto que tiene el movimiento de balines en las pistas de forma oblicua para transmitir el momento de rotación. Esto tiene un alto rendimiento y la atención de atracción como una "V" constante.
